

State of the Art Vehicle & Coldstore Temperature Recorders

Storm Controls personnel have been designing and manufacturing at the leading edge of electronic technology for over 30 years and has many years of experience in design & production of electronic recording equipment for the transport and associated industries.

Storm Controls have utilised the very best of the product ideas generated over the periods research and experience in the field, in order to arrive at our very best and most versatile product range ever.

Recognising that our Clients require a robust and completely intelligent system which meets or exceeds the very latest food regulation requirements, the engineers at Storm have elevated Cold Store and Vehicle Recording to a higher plain and completely different standard of excellence. The defining facts is that no matter whether your need is for a simple stand alone recorder or a unit inclusive of data transmission and/or a satellite vehicle tracking system, you may be assured of consistent high build and design quality.

Our award winning products are designed and manufactured completely within our own purpose built facility in Central Scotland under our control. We firmly adhere to the highest quality standards.

Storm's Recorder products are easily installed by a competent engineer and we are likely to have a version that suits your needs. Whatever your market, whether it be transportation or storage of food, or high security items such as alcohol, cigarettes, electronics or cash movements Storm Controls can confidently supply you.

In recognition of the changing needs of Clients, our engineers will be pleased to work with you in order to meet specific requirements not covered by our standard range.

Since we design and build in-house, you will always be assured of full product support, technical assistance and advice direct from source.

We look forward to being of service.

Iain Graham

Managing Director
